

```
{
  "overallRating": 70,
  "team": "The team of NEAR Protocol has a substantial background in computer science and blockchain technologies, but very few members have prior entrepreneurial experience which may impact execution of plans.",
  "whitepaper": "The whitepaper of NEAR Protocol is robust and well-structured. It provides a clear understanding of the technical parts of the project. However, it lacks details about token economics and application scenarios.",
  "tokenomics": "NEAR Protocol has a circulating supply of 1,217,906,154 and a total supply of 1,225,067,293. The allocation seems to be reasonable, but the vesting terms are not clearly defined which could cause concerns about token value sustainability.",
  "community": "NEAR Protocol has a medium community following comparing to other similar projects. However, the level of active engagement and positive sentiment are favourable but have room for improvement.",
  "roadmap": "The roadmap of NEAR Protocol appears to be ambitious but feasible. However, it may face challenges due to the rapidly changing environment of the cryptocurrency market.",
  "strengths": [
    "Strong technical team",
    "Comprehensive whitepaper",
    "Good level of community sentiment"
  ],
  "weaknesses": [
    "Limited information on token economics in whitepaper",
    "Undefined vesting terms",
    "Lack team members with entrepreneurial background"
  ],
  "recommendations": "NEAR Protocol team should consider adding more details to the whitepaper about the token economics and their applications. They should also work on building a stronger and more engaged community. The team should continuously update their roadmap based on current market conditions to increase adaptability."
